

Smart 911

In life, we never know when an emergency will arise so do yourself and your family members a favor by creating a Smart911 profile. This lifesaving service has been recognized by thousands of trusted sources across the country and was implemented by the Hamilton County 911 system this year.

The majority of 911 calls are made on mobile phones. When a 911 system operator takes a call, they do not know who is making the call. Due to the circumstances surrounding a 911 call, sometimes the message is unclear because the caller is in a chaotic situation or in panic mode. Without an identifiable location of where the emergency is taking place relayed to the 911 operator, the operator must rely upon cell tower proximity.

If you have created a Smart911 profile, dispatchers and emergency personnel will be able to instantly access this and see who you are, who your emergency contacts are, what if any medical conditions you have, your home and work addresses, the make and model of your vehicle, and any other detailed information that you wish to include in your profile that you can easily manage and edit at any time. You can also include all family members in your online profile.

A Smart911 profile is free, private and secure so sign up today at [Smart911.com](https://www.smart911.com) so that emergency personnel can get the information they need to help you as quickly as possible.
